

Work is an asset

In the Sotek foundation, we put people to the forefront and believe that work and activities are the keys to wellbeing and social inclusion.

At Sotek, we feel that it is important to respect and support colleagues and customers. Our values include continuous improvement, the ability to change, appreciating people and working together.

Finding one's own place is vital

We offer activities facilitating employment to e.g. young people without education, people going through rehabilitation or long-term unemployment and people with partial work abilities. For disabled people, we offer shared activities, participation and the sense of success through work and activities.

We seek to find meaningful assignments for all the participants in the employment activities, for example in the fields of crafts, metal and wood working, assembly, renovations and maintenance. Operations promoting employment are also offered by Lime cafés and Goodwill thrift stores.

To ensure the quality and impact of our operations, we work closely together with entrepreneurs, vocational institutions and our extensive stakeholder network.

Our service lines:

Workforce Development and Innovative Development Services

Rehabilitation and inclusion services

Operations and Technical Services

Services for Disabled Persons

Are you interested in crafts, metal or wood working or some other Sotek activity that promotes finding employment? Contact your worker at your Employment Office.

Work activities for the disabled can be applied for through the disability services of your own municipality.
